Bog - this essence was made in the Stepstone Bog near Kachemak Bay in southcentral Alaska. Bogs are swampy habitats that harbor a rich diversity of plant and insect life. They hold the fresh new energy of peat and are alive with an abundance of elemental energies. On a vibrational level, bogs are special containers of the heart energy of the planet. They also represent freedom, joy, and adventure-the freedom of wilderness, and wide open spaces. Their healing gift to the human kingdom is to help us prepare and expand the spaces we hold for new experience, to help us learn what it is like to live with an open heart and a spacious mind. The Bog Essence represents a place of special connection with the Earth Mother. The earth is pre-filled with wisdom, potential, fresh energy, and new beginnings, all held in an enormous heart space. This essence is about potential-not only the realization of potential, but also for the ability to hold potential for new creation. It can be used to support any creative act, but it is especially applicable for women, to help them hold the feminine heart space as a chalice for creating new life, and as a source of nurturing energy for their families.

Solar Eclipse - this essence was made in the northern interior of Alaska during the solar eclipse of 7/21, 1996. It is an essence for balancing and harmonizing the feminine and masculine energies in men and women and for the conscious empowerment of the inner male, especially where an imbalance exists due to dominant feminine energy. This essence is helpful in situations where the mother took on the responsibility for all aspects of a child's development because the father was incapable or absent, or because she was unwilling to share responsibility with the father or relinquish her control over the child in later years. In such cases, the individual must eventually break free of the eclipsing energy of the mother and at the same time learn how to develop or her own masculine qualities. The Solar Eclipse essence facilitates this process by working with the person to balance their inner masculine/feminine dynamic. It does this by bringing one's focus and awareness to what the inner male requires for healing and balance, and by helping one access the fortifying energy of the Sun.

Stone Circle - this essence was prepared within a naturally occurring circle of stones located high in the Talkeetna Mountains of central Alaska. The formation of energy created by this circle of stones has immense healing power. It provides a protected space, a place to come back to after journeys and adventures for rest and nurturing. The energy of this circle can replace or replenish what has been lost through stress, misuse of power, the trials and tribulations of living in the world. The energy in this circle is what a balance of elemental energies feels like in their natural, harmonious state. The Stone Circle essence is particularly useful for those who are working with balancing energy-especially those who are doing energy release processes with people (consciousness work, past-life work), buildings and houses (space clearing), and landforms (battle energy release). This essence creates an aura of solid protection in the energy field so that one does not take on any of the strong or unbalanced energies that one is called to assist in transmuting.

Typhoon - this essence was prepared during a typhoon on the Izu Peninsula in Japan. It was made with water from the storm and a small amount of water from a local spring. Typhoon is about surrender, trust and cleansing. It teaches us how to surrender to the cleansing power of nature with enough trust to let this energy in, without trying to block it in any way, so that it can do its healing work. The message of this essence is "whatever you don't have anchored with purpose and intent is going to be carried away, so focus on what is important and let the rest go". Typhoon is a very penetrating essence that can work its way into our densest levels of resistance. It can also teach us about intensity-how to work with it in our lives, and how to co-create with it in nature.

Winter In August - this essence was made in water from melted snow on the Greenland ice sheet in the month of August. An essence for the clarification of identity; helps one determine what is essential to one's heart in life; for clearing the mind, heart, and emotional realms of all that is not necessary to the realization of true PEACE in one's life and on the planet.
